About Us

'Safe journeys, every time'. This is what we strive for at Safe Transport Victoria (ST Vic).

As the safety regulator for commercial passenger vehicles, buses and maritime, what we do impacts the everyday lives of Victorians. Our role is to work with these industries and the communities they serve to ensure a transport system that inspires confidence for users.

We are focused on creating impact by being an intelligence-led regulator, agile to technological disruptions in the market and highly responsive to community expectations and needs.

We are also in the business of thinking big. We are reimagining what's possible in how we regulate, and we welcome those who are interested in reshaping and redefining how we work.

Safe Transport Victoria is committed to building a culture of 'working as one'. This means our people share openly, question respectfully and build together. This also means we invest in our people and provide personal and professional development programs to create a workforce that is empowered, innovative and adaptable.

Job description:

About the Role

Reporting to the IT Program Manager, the Business Analyst plays a key role in a significant delivery program at ST Vic, shaping requirements, translating business needs and supporting the delivery of practical solutions.

Working closely with stakeholders, project teams and technical specialists, the role brings clarity to complex problems, develops high-quality analysis artefacts and helps create strong foundations for successful delivery.

The responsibilities of the Business Analyst will include, but are not limited to:

- Driving business analysis activities to define business needs and requirements
- Facilitating workshops and stakeholder discussions to gather insights and build alignment
- Translating business needs into user stories, acceptance criteria and clear documentation
- Analysing current and future state processes and identifying improvement opportunities
- Supporting backlog refinement and delivery planning in an agile environment
- Preparing high-quality analysis artefacts, including process maps and requirements documentation
- Working across business and technical teams to manage risks, dependencies and impacts
- Supporting testing, implementation and transition into business-as-usual operations.

Demonstrated experience delivering business analysis in digital, technology or transformation environments, including discovery, requirements definition and documentation.

Experience working in agile teams, facilitating workshops, engaging stakeholders and contributing to delivery outcomes in a collaborative and fast-paced environment will be highly regarded.

About You

The successful candidate will be a capable and adaptable business analyst with strong communication skills, sound judgement and a practical approach to problem-solving.

A collaborative mindset, strong stakeholder engagement skills and the ability to turn complexity into clear, actionable outcomes will be important in this role.

Qualifications

- Tertiary qualifications in Business, Information Technology or a related discipline are desirable.

- Professional Business Analysis and/or Agile certifications, such as CBAP, CCBA, SAgile or Lead Agile, are highly desirable
- Equivalent professional experience may also be considered.

Further Information

For a confidential discussion, please contact Andrew Lambert, IT Program Manager via email andrew.lambert@safetransport.vic.gov.au or mobile [040000908](tel:040000908).

It is an inherent requirement of this position that the employee is ready, willing, and able to perform work outside their ordinary place of residence, including at ST Vic workplaces.

What we offer you?

ST Vic is committed to building a culture of flexible work arrangements, providing professional development programs and supporting ways of working that help employees balance work and life. We welcome applicants from a diverse range of backgrounds, including veterans, people who identify as Aboriginal and Torres Strait Islander, have a disability, are from varied cultural backgrounds and those who identify as LGBTIQ+.

A Workplace committed to safety and wellbeing

ST Vic is committed to providing a safe and healthy workplace for all its people, including contractors and visitors. We have a strong focus on initiating wellness events for our people to foster a sense of enjoyment and positive mental health. In some instances, ST Vic also offers flexible working arrangements.

Diversity and Inclusion

ST Vic's broad diversity program enables us to attract, recruit, retain and develop a diverse workforce to foster greater innovation, greater customer connection and increased wellbeing and satisfaction.

Learning and Development

We want you to grow, develop and learn with us! ST Vic provides you with access to a range of internal and external learning and development opportunities to support your performance in your role and further your career aspirations.

How to Apply

Please click the 'Apply Now' button. As part of the application process, you will need to provide a copy of your resume and a cover letter of no more than 1 page in length addressing your skills, experience and interest in the position.

Applications close at midnight 18 August 2026

If you require adjustments to the recruitment and selection process, or require an alternative format to any of the application material, please don't hesitate to get in touch with the contact person listed on this ad.

Title: Senior Business Analyst

Company: BAE Systems

Job Type: Business/Systems Analysts (Information & Communication Technology)

Location: Melbourne VIC

Link: [Senior Business Analyst Job in Melbourne VIC - SEEK](#)

Job description

SENIOR BUSINESS ANALYST

Job Location: Melbourne - VIC – We offer a range of hybrid and flexible working arrangements – please speak to your recruiter about the options for this particular role.

Who we are:

Join BAE Systems and you'll be part of something bigger. As a valued member of our global colleague network, you'll bring your unique skills and perspectives to help pioneer progress and protect what matters most. You'll be trusted to play your part in delivering the advanced, technology-led defence, aerospace and security solutions of tomorrow - shaping a safer future, for all of us.

From the depths of the ocean, to the far reaches of space - there's no limit to where a career at BAE Systems could take you.

Role Description:

We have an exciting opportunity for a Senior Business Analyst to join our BAE Systems Digital-Data-Cyber team, based at Flinders Street, South Australia, reporting to the BA Manager.

We embrace flexible work arrangements at BAE Systems Australia, such as working a 9-day fortnight.

You will be responsible for the clarification of business or customer needs through the investigation, analysis, review and documentation of requirements to ensure that delivered solutions are appropriate and aligned to the business or customer needs.

Core Duties:

- Collaborate with business, engineering, and IT teams to identify business challenges and opportunities, and analyse current processes to pinpoint areas for improvement.
- Manage stakeholders through effective expectation and prioritisation management, and mapping of requirements to stakeholder needs
- Build positive working relationships to ensure alignment on approach and solution delivery against the roadmaps and digital direction of the program
- Provide guidance and advice on current technology initiatives and business analysis techniques
- Conduct process analysis and gap analysis, defining current and future state processes
- Lead requirements and use case elicitation, documentation, and management, ensuring traceability and quality.
- Perform solution option analysis, including assessment of feasibility, risks, impacts, and value.
- Undertake Capability Support Model analysis to define operational ownership, support structures, and service considerations.
- Define and manage benefits analysis and benefits realisation inputs.
- Support testing activities, including test case development input, defect analysis, and business validation.
- Facilitate workshops and stakeholder engagement across business, data, digital, and cyber teams.
- Proactively contribute to uplift of BA practices, templates, standards, and continuous improvement initiatives.

About YOU

- Extensive experience as a Business Analyst delivering digital and technology initiatives
- Strong experience in business case development, requirements engineering, process modelling, and benefits management.
- Demonstrated capability in working across complex stakeholder environments.
- Experience supporting enterprise systems, digital platforms, data initiatives, or cyber-related projects.
- Strong analytical, facilitation, and communication skills.

- Ability to translate strategic objectives into clear, structured deliverables Extensive experience in stakeholder engagement, requirements analysis and effective communication are considered essential.
- A proven track-record of being involved in IT projects is considered desirable.
- Relevant tertiary qualification/ certification in business analysis or process improvements is considered desirable.
- Hold defence security clearance or eligibility to obtain a Baseline clearance.

The DDC Team

We are committed to delivering exceptional digital portfolio services and solutions to empower our customers and business in achieving their strategic business objectives. Our department is dedicated to designing and implementing principles and governance that enable the successful delivery of digital portfolio services.

Why BAE Systems?

Here you'll build a career with purpose and limitless possibilities. With lifelong learning and meaningful work - this is a place where you can grow your career with confidence and be empowered to be your best. You'll be recognised for your contribution and enjoy rewards tailored to what's most important to you and your family - support for your financial and personal wellbeing, as well as a balanced lifestyle. In an environment embracing sustainable ways of working and with a strong sense of shared purpose, our supportive culture is a place you can feel you belong and proud of the difference you make.

A place where everyone can thrive

We're committed to building an inclusive workplace where everyone feels valued and supported. We know that a diversity of backgrounds, perspectives and experiences strengthens our teams and is vital to the work we do.

We support our veteran community through VetNet Australia, along with initiatives such as Reserve Service Leave, a Veteran Mentoring Program, and partner-supported programs.

We welcome applications from all candidates and strongly encourage Aboriginal and Torres Strait Islander peoples to apply.

We are proud to be recognised as an employer of choice for women by WORK180 and recipients of the **Benchmarcx Top Employer for Candidate Experience Excellence 2026**. As members of the **Circle Back Initiative**, we commit to responding to every applicant.

If you require any reasonable adjustments during the recruitment process, please contact our recruitment team to discuss the support you may need. You can also connect with us via Careers and Employment.

Security statement

Please note, as a defence security clearance is required for this role, applicants must be Australian citizens and either possess or be eligible to obtain and maintain one. Further information regarding security clearances.
