SUMMARY

Aspiring Business Analyst with a Master of Information Technology (Software Engineering) and hands-on industry experience translating business needs into working technical solutions. Skilled in requirements gathering, process mapping, data analysis and stakeholder communication within agile delivery teams, supported by a strong technical grounding in Python, SQL and web technologies. Experienced in documenting user stories and functional specifications, and in coordinating testing to confirm solutions meet agreed requirements.

WORK EXPERIENCE

Amivir Infotech (Web Development Intern)

Jul 2023 - Aug 2023

- Assisted in developing a Hotel Booking & Reservation Website, inspired by platforms such as Booking.com, enabling users to search, view and reserve accommodations.
- Designed responsive web interfaces using HTML, CSS and JavaScript to enhance user experience across devices.
- Integrated frontend components with backend logic to support booking forms and data storage.
- Conducted testing and debugging to ensure smooth navigation, functionality and performance optimisation.

ViitorCloud Technologies (Intern Engineer)

Feb 2024 - Apr 2024

- Contributed to the development of a Predictive Analytics Model for Business Insights, assisting in data collection, cleaning and model training.
- Built and tested a machine learning model from scratch under senior supervision, strengthening understanding of AI workflows and deployment processes.
- Prepared structured technical documentation and progress reports to support project tracking and knowledge sharing.
- Worked collaboratively within an agile team environment to deliver assigned modules within project timelines.

Spider Communication (Software Trainee)

Jul 2024 - Oct 2024

- Contributed to the development of a Real Estate Listing & Analytics Platform, designed to manage property listings, user inquiries and data-driven insights.
 - Assisted in implementing machine learning models using Python to analyse property trends and support price estimation features.
 - Supported backend development, data preprocessing and system testing to enhance application reliability and performance.
 - Collaborated with senior developers in sprint planning, documentation and progress reporting to ensure timely project delivery.
 - Participated in debugging and optimisation tasks to improve system efficiency and user experience.
-

BUSINESS ANALYSIS SKILLS

Analysis & Documentation

- Requirements elicitation, analysis and documentation – BRD, FRD, user stories, acceptance criteria
- Business process mapping and modelling – BPMN, UML, as-is / to-be process flows
- Gap analysis, SWOT analysis, root cause analysis and requirements prioritisation
- Stakeholder identification, analysis and engagement; workshop and interview facilitation
- User acceptance testing (UAT) planning, execution and defect tracking
- Data analysis, reporting, dashboards and wireframing for solution validation

Tools & Technologies

- Project & collaboration: Jira, Confluence, Trello, Microsoft Teams, SharePoint, Miro
- Modelling & diagramming: Microsoft Visio, Lucidchart, draw.io, Figma
- Data & reporting: SQL, Advanced Excel (pivot tables, lookups, dashboards), Power BI and Tableau
- Programming: Python (pandas, NumPy, scikit-learn), Java, C, HTML, CSS, JavaScript
- Methodologies: Agile / Scrum, Waterfall, OOP, manual and automated software testing

Soft Skills

- Stakeholder communication, relationship building and technical-to-business translation
- Critical thinking, analytical problem solving and attention to detail
- Active listening, negotiation, influencing and conflict resolution
- Time management, prioritisation, adaptability and collaborative teamwork

EDUCATION

Bachelor Of Computer Engineering

2020 - 2024

Gujarat Technological University

- CGPA – 8.22/10

Masters of Informations Technology

Nov 2024 - Present

Charles Darwin University

- Majors in Software Engineering
- Current GPA: 5.375/7

ACADEMIC PROJECTS

House Price Prediction

- Developed a predictive model using housing data to estimate property prices.
- Conducted data cleaning, feature selection and regression modelling.
- Implemented a web interface to generate real-time price predictions based on user inputs.

Brain Tumour Detection

- Trained a machine learning model on MRI scan data to detect brain tumours.
- Performed data preprocessing and model evaluation to improve prediction accuracy.
- Integrated the model into a web interface allowing users to upload images and receive instant results.
