

I set up a Business Analyst Calendar and invited my team members so we can input blocks of our occupied hours and with this data we can select windows where most of us will be free for the weekly meetings.

The screenshot displays the Microsoft Teams calendar application. On the left, a sidebar contains navigation icons for Activity, Chat, Teams, Calendar, Calls, OneDrive, and Apps. The main area shows a calendar for August 2026. The top of the calendar has a search bar and navigation controls. Below this, a monthly view shows the days of the month. The main calendar grid shows a repeating pattern of events. The events are as follows:
