

Possible things you can add to skills/tools/technologies section of your resume

***** EVERY ONE MUST HAVE tools – JIRA, Confluence, Visio, Draw.io, Trello, Microsoft Planner, OneNote, Microsoft Office Suite, Microsoft Outlook & Teams, Git, GitHub & Bitbucket, SharePoint & OneDrive, Power BI, Lucidchart, Microsoft Forms, Excel, Notepad++, PowerShell Script & Batch Script

Business Analysis Core Concepts (found via research and googling)

- Requirements Elicitation & Gathering (Workshops, Interviews)
- Stakeholder Management & Communication
- Agile / Scrum Frameworks
- Writing User Stories & Acceptance Criteria
- Business Process Modeling Notation (BPMN) & Flowcharts

Data & Analytics (Crucial for IT BAs)

- Data Analysis & Data Reporting
- Business Intelligence
- Data Transformation (ETL Basics)
- Data Querying (SQL)
- Data Visualisation & Dashboarding

Advanced System Concepts

- System Integration Basics & API Documentation
- UML Diagrams (Use Case, Activity, Sequence Diagrams)
- User Acceptance Testing (UAT) Coordination
- A/B Testing Analysis

Possible things you can add to certifications sections of your resume

Business Analysis & Agile

- ECBA (Entry Certificate in Business Analysis) – IIBA
- Certified ScrumMaster (CSM) or Professional Scrum Master (PSM I)

Data & BI Tools

- Microsoft Certified: Power BI Data Analyst Associate
- Google Data Analytics Professional Certificate

Example Project Entries

Requirements Gathering & Process Optimization Project

Facilitated stakeholder workshops to elicit and document clear business requirements for a new IT system.

Mapped 'As-Is' and 'To-Be' business process workflows using Visio/Lucidchart to identify operational bottlenecks.

Translated business needs into actionable user stories with clear acceptance criteria managed via JIRA.

Business Reporting with Power BI & SQL

Extracted and manipulated data from relational databases using SQL queries (Joins, Aggregations).

Developed interactive dashboards in Power BI to track key performance indicators (KPIs) for stakeholders.

Improved business decision-making capabilities by providing actionable, visual data insights.

Agile & BA Courses					
#	Name	Time	Level	Description	website
1	Introduction to Business Analysis	2h 35m	Beginner	A foundational course covering the core principles, roles, and responsibilities of a business analyst.	https://www.linkedin.com/learning/introduction-to-business-analysis/the-business-analysis-process-overview

2	Business Analysis: Essential Tools and Techniques	48m	Beginner + Intermediate	Explores the practical, everyday tools and techniques used to analyze business needs.	https://www.linkedin.com/learning/business-analysis-essential-tools-and-techniques-2021/defining-the-basic-business-process-model?autoSkip=true&resume=false
3	Jira Tutorial for Beginners	20m	Beginner	Focuses on practical applications, teaching how to navigate Jira, create epics, write user stories, and manage agile sprint boards.	Jira Tutorial for Beginners — Learn Jira in 20 Minutes
4	Requirements Elicitation for Business Analysis: Stakeholder Conversations	1h 24m	Beginner + Intermediate	Focuses on techniques for effectively communicating with stakeholders to gather, refine, and document business requirements.	https://www.linkedin.com/learning/requirements-elicitation-for-business-analysis-stakeholder-conversations/discover-requirements-of-stakeholders
5	Agile Requirements Foundations	1h 43m	Intermediate	Covers how business analysis principles are applied within an Agile framework, focusing on continuous delivery and adaptability.	https://www.linkedin.com/learning/agile-requirements-foundations/
6	AI Chat Prompts for	48m	Beginner + Intermediate	Explores how to integrate generative AI and	https://www.linkedin.com/learning/ai-chat-prompts-for-business-analysis/working-with-generative-ai-as-a-business-analyst

	Business Analysis			ChatGPT into daily business analysis workflows to improve efficiency.	
Process Modeling					
#	Name	Time	Level	Description	website
1	Business Analysis Foundations: Business Process Modeling	1h 18m	Beginner	Teaches the fundamentals of creating visual models and flowcharts to represent business processes.	https://www.linkedin.com/learning/business-analysis-foundations-business-process-modeling/introducing-common-business-modeling-tools
2	Visio 2021 Essential Training	1h 58m	Beginner + Intermediate	Learn to create flowcharts, process maps, and UML diagrams to visually communicate complex business concepts and system architectures.	https://www.linkedin.com/learning/visio-2021-essential-training-office-2021-ltsc/create-easy-to-understand-visuals
3	Lucidchart Tutorial: How To Use Lucidchart For Beginners (2026)	10m	Beginner	A popular cloud-based alternative to Visio. Learn collaborative diagramming, wireframing, and interactive flowchart creation.	Lucidchart Tutorial: How To Use Lucidchart For Beginners (2026)
Data & BI (SQL,					

Excel, Power BI)					
1	Data Analysis: Investigate with SQL	1h	Beginner	Focuses on using SQL queries to investigate datasets and perform foundational data analysis tasks.	https://www.linkedin.com/learning/data-analysis-investigate-with-sql/delete-why-learn-sql-today
2	Excel for Business Analysts	2h 41m	Intermediate	An intermediate-level guide focused on utilizing Excel for data manipulation, analysis, and problem-solving.	https://www.linkedin.com/learning/excel-for-business-analysts/benefit-from-business-analytics
3	Getting Started with Power BI	1h 40m	Beginner	An introductory course designed to teach the fundamentals of connecting data and building visual reports in Power BI.	https://www.linkedin.com/learning/getting-started-with-power-bi-24648076/analyze-and-visualize-your-business-data
