

WEEK 1 - Foundations: Excel + SQL Basics

Focus: Data cleaning, formulas, pivot tables, SQL fundamentals.

Weekly Goals

- Master Excel basics - cleaning, formulas, pivot tables
- Learn SQL fundamentals - SELECT, WHERE, ORDER BY, JOIN
- Build your first mini-project

Daily Breakdown

Day 1–2:

- Learn Excel fundamentals
- Functions: SUM, AVERAGE, COUNT, IF, VLOOKUP
- Pivot tables + charts
- Practice cleaning messy datasets

Day 3–4:

- SQL basics
- SELECT, WHERE, ORDER BY
- Filtering, sorting, basic aggregations

Day 5–6:

- SQL JOINS (INNER, LEFT, RIGHT)
- GROUP BY, HAVING
- Practice on free platforms (SQLZoo, HackerRank)

Day 7 (Project Day): Build Project 1: Excel Sales Dashboard

- Clean dataset
- Create pivot tables
- Build charts
- Create a dashboard

WEEK 2 - Python for Data Analysis

Focus: Pandas, NumPy, data cleaning, EDA.

Weekly Goals

- Learn Python for data analysis
- Clean datasets using Pandas
- Perform exploratory data analysis (EDA)

Daily Breakdown

Day 1–2:

- Python refresher (if needed)
- Pandas basics: `read_csv`, `head()`, `describe()`
- Data types, missing values

Day 3–4:

- Data cleaning
- Handling duplicates
- String operations
- Date/time cleaning

Day 5–6:

- Exploratory Data Analysis
- Grouping, aggregations
- Correlation analysis
- Basic visualizations (Matplotlib, Seaborn)

Day 7 (Project Day): Build Project 2: Python EDA Report

- Choose a dataset (e.g., Netflix, COVID, sales)
- Clean it
- Analyze patterns
- Create visualizations
- Export a Jupyter Notebook

WEEK 3 - Data Visualization + Power BI/Tableau

Focus: Dashboards, storytelling, business insights.

Weekly Goals

- Learn Power BI or Tableau
- Build interactive dashboards
- Learn data storytelling

Daily Breakdown

Day 1–2:

- Power BI/Tableau basics
- Import data
- Clean data
- Build simple visuals

Day 3–4:

- Advanced visuals
- DAX basics (Power BI)
- Filters, slicers, drill-downs

Day 5–6:

- Dashboard design principles
- Storytelling with data
- Creating KPI cards

Day 7 (Project Day): Build **Project 3: Interactive Dashboard** Examples:

- HR analytics dashboard
- Sales performance dashboard
- Customer churn dashboard

WEEK 4 - Portfolio + Job Preparation

Focus: Resume, GitHub, LinkedIn, mock interviews.

Weekly Goals

- Build a portfolio with 3 projects
- Create a data analyst resume
- Prepare for interviews
- Learn business problem-solving

Daily Breakdown

Day 1–2:

- Polish all 3 projects
- Upload to GitHub
- Write project summaries

Day 3:

- Create a data analyst resume
- Add skills: SQL, Excel, Python, Power BI

Day 4:

- Optimize LinkedIn
- Add projects
- Add keywords

Day 5:

- Practice interview questions
- SQL queries
- Scenario-based questions

Day 6–7:

- Apply to entry-level roles
- Junior data analyst
- Reporting analyst
- Business intelligence intern
