

BUSINESS ANALYSIS CANVAS

Domain Knowledge

What are the core business rules and regulatory constraints?

Which BA practices (e.g., BPMN modeling, SQL data analysis) need to be rock solid for us to succeed?

Which tools (e.g., JIRA, Confluence, Visio) do we need to master? How do we get there?

How do we maintain domain expertise amidst changing standards?

Market & Strategy Context

What is the overarching business strategy driving this project?

How does the rate of change in the market influence our solutions?

How do we stay aligned with market demands and competitors?

Internal stakeholders

Include internal customer and internal users

Who are they?

What are their true business needs versus stated wants?

How do we systematically elicit requirements (e.g., workshops, interviews)?

What is the core business value we are trying to deliver to satisfy those needs?

How do we create transparency (e.g., requirement traceability, reporting?)

Process Feedback

How do we evaluate the effectiveness of our elicitation and modeling techniques?

How do we get feedback on our collaboration with the development team?

Are our agile retrospectives generating actionable improvements?

Solution Feedback

Did the delivered solution meet the original business case and deliver value?

What KPIs or data points are we tracking to validate success?

How do we gather feedback on the end-user experience post-launch?

External stakeholders

Who are the end-users and customers?

What are their true needs, pain points, and current User Journeys?

What is the core value we are trying to deliver to satisfy them?

Requirements

Do we have a clear 'Definition of Ready' for our sprints?

Are User Stories written following the INVEST criteria?

Do all requirements have testable Acceptance Criteria (Given-When-Then)?

Prioritization

How do we systematically manage and refine the product backlog?

Which prioritization framework are we using (e.g., MoSCoW, WSJF)?

How do we define the Minimum Viable Product (MVP)?

Organization & Alignment

How do we act as the bridge between business stakeholders and the IT team?

How do we regulate coordination and manage scope changes effectively?

Innovation & Optimization

How do we map 'As-Is' processes to identify operational bottlenecks?

How do we design 'To-Be' processes for disruptive value improvements?

How can we responsibly integrate AI tools to enhance productivity?

Acceptance

Is our Requirement Traceability Matrix (RTM) updated and complete?

How do we coordinate User Acceptance Testing (UAT)?

Do we have clear release criteria and stakeholder sign-off?
