

Week 2

Tool Table

Tool	What the tool is	What it is used for	Who typically uses it	One key benefit or feature
JIRA	An Agile project management software.	Tracking project progress, managing sprints, and logging software bugs.	Software Developers, Business Analysts, Project Managers.	Offers highly customizable Scrum and Kanban boards for visual tracking.
Confluence	A team workspace and collaborative wiki tool.	Creating, storing, and sharing project documentation and requirements.	Business Analysts, Product Managers, Development Teams.	Integrates seamlessly with JIRA to link requirement docs directly to tasks.
Visio	A desktop diagramming and vector graphics application.	Creating detailed flowcharts, process maps, and system diagrams.	Business Analysts, System Architects, Operations Managers.	Provides a massive library of industry-standard shapes and templates.
Draw.io	A free, browser-based diagramming software.	Quickly sketching simple flowcharts, ER diagrams, and UML diagrams.	Students, IT Professionals, Agile Teams.	Saves files directly to Google Drive or OneDrive without needing an account.
Trello	A web-based Kanban-style list-making application.	Managing simple projects and organizing daily tasks visually.	Marketing teams, Project Managers, Individuals.	Features a highly intuitive, easy-to-use drag-and-drop interface.
Microsoft Planner	A task management tool within the Microsoft 365	Assigning team tasks, setting due dates, and tracking basic progress.	Corporate Teams, Department Managers,	Integrates deeply with Microsoft Teams to manage tasks without

	ecosystem.		General Staff.	leaving chat.
OneNote	A digital note-taking application.	Capturing meeting minutes, gathering research, and brainstorming ideas.	Students, Business Analysts, Professionals across all fields.	Syncs seamlessly across all devices with flexible, free-form page layouts.
Microsoft Office Suite	A collection of core business productivity software (Word, PowerPoint, etc.).	Writing formal reports, creating slide decks, and basic documentation.	Almost everyone in the corporate and academic world.	The universal industry standard, ensuring compatibility with all stakeholders.
Microsoft Outlook & Teams	Enterprise communication and collaboration platforms.	Managing emails, calendars, instant messaging, and video conferencing.	Corporate employees, Remote teams, Management.	Centralizes all internal and external business communication in one hub.
Git	A distributed version control system.	Tracking changes in source code during the software development process.	Software Developers, DevOps Engineers, Data Engineers.	Allows multiple developers to work on the same codebase without conflicts.
GitHub & Bitbucket	Cloud-based hosting services for Git repositories.	Hosting code online, reviewing code, and automating software builds.	Software Engineering teams, Open-source contributors.	Provides robust "pull request" features for peer code review.
SharePoint & OneDrive	Cloud-based document management and storage platforms.	Hosting company intranets, secure file sharing, and personal cloud storage.	Enterprise organizations, General employees, IT Admins.	Offers granular security permissions and automatic document version history.

Power BI	A business analytics and data visualization service.	Transforming raw data into interactive dashboards and visual reports.	Data Analysts, Business Analysts, Executives.	Can connect to hundreds of different data sources (SQL, Excel, Web) easily.
Lucidchart	A web-based visual workspace and diagramming application.	Collaboratively mapping out business processes and system architectures.	Business Analysts, Product Managers, IT teams.	Real-time collaboration allows multiple users to edit the same diagram simultaneously.
Microsoft Forms	An online survey and quiz creator.	Gathering stakeholder feedback, conducting polls, and collecting data.	Business Analysts, HR Professionals, Educators.	Automatically exports survey response data directly into Excel for quick analysis.
Excel	A powerful spreadsheet software application.	Data manipulation, complex calculations, and building basic data models.	Business Analysts, Financial Analysts, Data Analysts.	Features powerful PivotTables for instantly summarizing large datasets.
Notepad++	A free, lightweight source code and text editor.	Viewing, editing, and formatting code or unstructured text files quickly.	Programmers, IT Support, System Administrators.	Supports color-coded syntax highlighting for over 50 programming languages.
PowerShell & Batch Script	Task automation and configuration management scripting languages.	Automating repetitive OS tasks, backups, and administrative jobs.	System Administrators, DevOps, IT Support.	Provides deep, programmatic control over the Windows operating system.

WinMerge	An open–source differencing and merging tool for Windows.	Comparing text files or folders to see exact changes and differences.	Developers, Quality Assurance, Technical Writers.	Visually highlights the exact text differences side–by–side for easy review.
KeePass	A free, open–source password manager.	Securely storing and managing passwords and private credentials.	IT Professionals, Security Teams, Everyday users.	Stores data locally in an encrypted database rather than relying on cloud servers.
