liangmich98@gmail.com | +61 404185835 | LinkedIn: www.linkedin.com/in/liang-huang-138b3a312

Profile

IT Master's student with a solid foundation in data analysis, programming, and databases, and also has work experience with Power Bi, Tableau, Python, Java, and MySQL through coursework and projects. Selected for the CDU AWESome Program and finished the placement in CDU Global. Built a mental health app for a course project and presented it at an NT innovation event to defence stakeholders. Also developed and deployed two web-based systems. Able to turn data into clear, intuitive and practical insights.

Education

Master of Information Technology, Major: Software engineering | Charles Darwin University 2025-2026

- Developing skills in programming, databases, and data analysis through coursework and projects; built and deployed two web applications and got invitation to present an Android app at an NT Defence Innovation event.
- Current GPA: 5.3 / 7.

Work Experience

CDU Global, Charles Darwin University, Darwin, Northern Territory July 2026

CDU AWESome program Intern

- Liaised with international education agents on recruitment and student enquiries
- Analyzed international student data to support recruitment planning
- Prepared reports for CDU Global to support agent and enrolment decisions

Monoprix Consulting Australia Pty Ltd, Darwin, Northern Territory Jan 2026 – June 2026

IT Intern

- Built and managed a MySQL database supporting over 10 tables of user and service data
- Developed core features (data input, record management) in TypeScript
- Tested and debugged to improve system stability and usability

Prosperity International Trading Limited Liability Company of WANGKANG GROUP, Dubai April 2024 – Nov 2024

Business Analyst

- Built Power BI dashboard tracking 10+ sales KPIs
- Cleaned 5,000+ rows of sales data using Power Query and SQL
- Automated KPI reporting, cutting manual effort by 50%
- Delivered data-driven insights to support business decisions

Darwin Table Tennis Association (DTTA), Darwin, Northern Territory March 2025 – Present

Ping-pong Coach

- Coached junior/adult players in weekly technique and match training
- Organized practices and supported local competitions

Projects

CDU International Students Enrolment Trends Dashboard

- **Dashboard Development:** Built a Power BI dashboard analyzing CDU international enrolment trends across multiple years.
- **Data Analysis:** Tracked key metrics including total enrolments, program type breakdown, and top source countries.
- **Trend Identification:** Identified enrolment growth trends and shifts in international student share over time.
- **Insight Delivery:** Delivered insights on source-market risk and diversification opportunities to support recruitment strategy.

Northern Territory Population Trends Dashboard (<https://github.com/liangmich/power-bi-dashboard>)

- **Data Cleaning and Pre-processing:** Processed and cleaned Northern Territory population datasets using Power Query, performing data validation, type conversion, and standardisation to ensure data accuracy and consistency.

- **Exploratory Data Analysis (EDA):** Analysed population trends using NT Government open data to identify year-over-year population change and growth patterns across different demographic groups.
- **Data Modelling and KPI Development:** Created DAX measures to calculate key metrics such as YoY population change and YoY growth rate (%), enabling clear performance tracking.
- **Interactive Dashboard Design:** Developed an interactive Power BI dashboard with trend and variance visualisations and slicers (Region, Aboriginal status, Sex) to support drill-down analysis and improve data-driven insights.

Monoprix Connect – Service Marketplace Platform (www.monoprixconnectd.com)

- **Relational Schema Design:** Designed and implemented a multi-table relational schema using Prisma ORM, defining entities across User, WorkerProfile, WorkerService, WorkerServiceApplication, and CustomerRequest with appropriate foreign key relationships and cascading delete constraints.
- **Schema Extension & Migration:** Used Prisma schema to extend the ServiceCategory enum across 7 categories and 50+ subcategories; managed schema synchronisation against a live MySQL database using prisma db push to maintain data integrity.
- **Data Modelling:** Modelled weekly availability as a structured JSON field in Prisma, capturing per-day time slot arrays with start and end times to support fine-grained scheduling and booking conflict detection.

AgriCalm App (<https://github.com/badMiguel/AgriCalm>)

- **Core Algorithm & Feature Engineering:** Developed a dual-input stress evaluation engine using TypeScript, integrating real-time facial detection metrics and self-reported survey data to dynamically calculate user stress levels and generate personalized mental health advice.
- **Mobile Application & Hardware Integration:** Built a cross-platform mobile application using React Native and Expo, seamlessly integrating native device camera APIs to capture and analyze facial indicators for non-invasive mental health monitoring.
- **Local Database Architecture:** Designed and implemented a secure, offline-first local database using SQLite to store sensitive user assessment histories and survey logs, prioritizing data privacy and enabling users to track their historical stress trends.

Skills

- **Data Analytics:** Power BI (DAX, Power Query), SQL, Excel (Pivot Tables), data cleaning and validation, dashboard design, data insight
- **Programming & Scripting:** Python, Java, JavaScript, Typescript, React, Node.JS, Shell/Bash, and PowerShell.
- **Cloud & Deployment:** AWS, Docker, Vercel and GitHub Pages.
- **Project Management & Tools:** Jira, Git, Teams, Outlook, Microsoft365(SharePoint, Power Automate),Lumi(H5P)
- **Professional Skills:** Communication, Teamwork, Resilience, Adaptability, Time Management, Problem Solving and Leadership.
